## Ex 2 – Flight Reservation

Plan a flight reservation form to your company.

Task:

1. The form starts with h1 header.
2. Using the right method that will show us the data as query string.

3. From -> text type
4. To -> text type

Both Are in the same line

5. Departure Date -> date type
6. Landing Date -> date type

Both Are in the same line

7. Numbers of passengers (can't accept negative numbers).
8. Valid passport -> checkbox type
9. Number of bags -> drop-down (max bags are 3).
10. Submit button that sends all inputs.
