

Intro to Web Development

Ex2 - CSS

Part A – Basic CSS

1. Create the following page :

2. Create the following page :

3 <h1> Tags :

-The two of them in the width of the page and the third one is the width of half of the page.

The second tag is with white color, whereas all the other are in red.

Declare all the styles in the page itself.

Hello

Good Bye

Thank You

3. You build a web site. The font in all the tables should be at BIG size and in red color.

Create 2 pages. Each page will have a table (2*2) with some text.

The second page page will also have a textbox. This textbox should ALWAYS have the same background color as the table in the same page.
